

LED RECESSED DOWNLIGHTS WITH INTEGRAL JUNCTION BOX

JESCO's latest innovative Recessed Downlight with Integral Junction Boxes is specifically designed for use wherever high-performance, very longlife general/ambient/accent interior lighting is sought for effective, maintenance-free, energy-saving recessed-ceiling solutions. They illuminate larger or smaller, contemporary or transitional, interior spaces and are well suited for any commercial, institutional or upscale residential application spaces.

GAME CHANGING UNIQUE FIXTURE DESIGN

Our newest offering of LED Downlight with integral Junction Box, uniquely shallow at under 4" high, installs easily in hard-to-light areas in any new construction or remodel, insulated or non-insulated ceilings without a housing. The unique fixture design simplifies the installation process while significantly reduces installation costs.

JESCO'S EXCLUSIVE DRIVERLESS AC LED TECHNOLOGY

The LED Downlights are powered by 120V AC LEDs that do not require the use of external drivers, thereby rendering the fixtures maintenance free and guaranteeing a long lifetime of use. A patent pending inrush current protection further protects the lifespan of the LED and dimmer.

- Market leading lumen output of up to 910 Lm from 12.8W
- Market leading efficacy of 71 Lm/watt
- High CRI of 80+
- Dimmable with Triac/ELV dimmer

4", 5" & 6" JB LED RECESSED DOWNLIGHTS

FEATURES

- Market leading lumen output of up to 910 Lm from 12.8W
- Market leading efficacy of 71 Lm/watt
- High CRI of 80+
- Dimmable 10-100% with most leading or trailing edge incandescent or low voltage dimmers
- Unique impact resistant polycarbonate lenses provide uniform light output with lamp like appearance
- Junction box is supplied with five ½" knockouts
